THE BUDDHIST CONCEPT OF 
PAṬICCASAMUPPĀDA BASED 
ON PĀLI MANUSCRIPTS: 
GENESIS, MEANINGS, 
ANNOTATED TRANSLATION, 
INTERPRETATION AND 
DOCTRINAL SIGNIFICANCE

Sanjoy Barua Chowdhury

Introduction

The doctrine of Paṭiccasamuppāda is considered a “central principle”1 of the Buddha’s teachings2. The Buddha acknowledged that the doctrine of Paṭiccasamuppāda appeared to him as an astonishing and eye-opening discovery that brought him vision, knowledge, wisdom and a deep understanding on the occasion of his enlightenment.3 In clarifying its doctrinal value along the path of awakening, the Buddha asserted that the realization of the Paṭiccasamuppāda is like the under-

1 The phrase, “central principle” alludes to the depth of the doctrinal worth of the Paṭiccasamuppāda based on Buddhist soteriology, i.e., nibbāna. The Buddha states that when one realizes the Paṭiccasamuppāda, they can experience the bliss of nibbāna. For a detailed analysis, see M I 184.
3 See S II 104.

standing of his “subtle and profound teachings”, i.e., the Dhamma. Because of its doctrinal prominence, the discourse of Paṭiccasamuppāda is frequently found in the mainstream Pāli manuscripts from Tipiṭaka. On the basis of canonical scriptures, scholars and Buddhist monks described the Paṭiccasamuppāda in various ways for thousands of years. The paper aims to clarify the genesis [or origin] of Paṭiccasamuppāda and its meaning, annotated translation, interpretation and doctrinal significance, based on the Nikāya manuscripts. Prior to academics and practitioners, an in-depth study of this research reveals why and to what degree the Pāli tradition values the thought of Paṭiccasamuppāda as articulating its insight into how to attain the path of ultimate liberation from a Buddhist perspective.

The Genesis of the Paṭiccasamuppāda

The Buddha stated that one of his quintessential teachings is the Paṭiccasamuppāda. Hence, it was expressed in various ways through-

---

4 In the Buddha’s teaching, the “subtle and profound teachings” are designated as the Dhamma in accordance with the Pāli Tradition, which is equivalent to Dharma in Sanskrit. According to Nyanatiloka, the four noble truths synthesize the Dhamma, the liberating law that the Buddha discovered and proclaimed. See the Venerable Nyanatiloka, Buddhist Dictionary: Manual of Buddhist Terms and Doctrines (Kandy: Buddhist Publication Society, 1960), 97. The four noble truths are expounded in the Mahāparinibbāṇa Sutta from the Dīgha Nikāya as “subtle and profound teachings”. The Buddha asserted that he experienced enormous sorrow for innumerable rebirths as long as he did not understand the essence of the four noble truths. For a detailed analysis, see D II 91.
6 Tipiṭaka is a Pāli or Tripiṭaka in Sanskrit, which means “Three Baskets”. The collections of the scriptures from the Suttas, Vinaya and Abhidhamma - the three divisions that constitute the Buddhist Canon - were originally preserved in the “three baskets” on palm-leaf manuscripts. See Peter Harvey, An Introduction to Buddhism: Teachings, History, and Practices (New York: Cambridge University Press, 2012), 459-462.
7 The Nikāya manuscripts allude to the subdivisions of the Suttaṭipitaka (Basket of Discourses) in the Pāli canon. As shown by the Tipiṭaka, there are five Nikāyas (collections) of suttā (discourses), namely: Dīgha Nikāya (The Long Discourses); Majjhima Nikāya (The Middle-length Discourses); Saṁyutta Nikāya (The Connected Discourses); Aṅguttara Nikāya (The Numerical Discourses); and Khuddaka Nikāya (The Minor Collection). “Tipiṭaka: The Pāli Canon”. Available online: https://www.accesstoinsight.org/tipitaka/ (accessed on July 11, 2022).
out the Tipiṭaka. Inquiring into the Pāli manuscripts, we learn that the thought of the Paṭiccasamuppāda appeared as a remarkable, stunning, and eye-opening discovery during the Buddha’s inward journey along the way of his journey to awakening. He further clarified that the Paṭiccasamuppāda articulated itself to him as vision, knowledge, insight, understanding and light. According to the Udāna, we come to know about the three watches of the night during the Buddha’s journey into awakening. Each night, the concept of the Paṭiccasamuppāda was applied to observe in one of three different ways: forwarding, reversing and both forwarding-reversing orders. Due to their applicability to understanding the process of life from its origins to eradication—from existence in saṃsāra to attainment in nibbāna, – the three distinct formulas are recognized as the practical aspects of the Paṭiccasamuppāda.

Aside from its practical aspect, the abstract formula of the Paṭiccasamuppāda was discovered during an insightful conversation that an arahat, Assaji Thera, had with Brahmin Upatissa, thereafter—

---

9 See S II 105.
10 The Udāna, the third manuscript of the Khuddaka Nikāya (the Minor collection), contains a rich collection of concise discourses, each of which culminates with a short verse spoken by the Buddha. The Udāna consists of eighty sutā (discourses) arranged into eight vaggas (chapters).
11 See Ud 1-3.
12 The Pāli word, saṃsāra, is frequently translated as “the cycle of life”. Nyanatiloka defines the term saṃsāra as “round of rebirth”. See Nyanatiloka, Buddhist Dictionary: Manual of Buddhist Terms and Doctrines, 297-298.
13 The Pāli term nibbāna, also known nirvāṇa in Sanskrit, translates as “blowing out” or “extinction”. See Nyanatiloka, Buddhist Dictionary: Manual of Buddhist Terms and Doctrines, 201. The goal of the Buddhist path is nibbāna, which is seen as the ultimate release from suffering in this existence. See Robert E. Buswell Jr. and Donald S. Lopez Jr., The Princeton Dictionary of Buddhism (New Jersey: Princeton University Press, 2013) 589-590. In a Buddhist context, nibbāna could be defined as going beyond the “cycle of life” of saṃsāra. According to the Ādittapariyāya Sutta of Samyutta Nikāya, the Buddha stated that the whole world is in flames and the extinction of greed, hatred and delusions are the state of nibbāna. For a detailed analysis, see S IV 19-20.
15 The Pāli phrase “arahat” designates people who have eradicated greed, hatred and delusion, and are free of all affiliations or cankers. See I. B. Horner, Early Buddhist Theory of Man Perfected: A Study of the Arahan (London: William and Norgate Ltd., 1936) 44.
16 Assaji Thera was one of the first five arahats of the Buddha. See S III 66, S IV 420.
ter known as Sāriputta. The Venerable Assi ji responded when asked about the philosophy of his instructor that the Buddha defined both the origins of all things [of dharmā] and how to eradicate them. The abstract formula of the Paṭiccasamuppāda exposes cause and effect, also known as the law of conditionality (idappaccayatā), which was found in a dialogue between the Buddha and his attendant, Ānanada. Since the teaching of the Paṭiccasamuppāda is positioned as a crucial discourse, it can be found in every Nikāya of Pāli manuscripts. Both the theoretical and practical aspects of the Paṭiccasamuppāda are equally important prior to the methodology of Buddhist soteriology.

The Meanings of the Paṭiccasamuppāda

The Pāli word Paṭiccasamuppāda is derived from a combination of two words: paṭicca and samuppāda. The first term paṭicca means “because of” or “on account of”, whereas the second word samuppāda refers to “arising on the ground of”, or “happening by way of cause”. Following the Pāli grammatical structure of sandhi (union), samuppāda

17 Sāriputta is one of the chief male disciples of the Buddha, together with Moggallāna. After hearing Assaji Thera’s presentation of the Buddha’s teaching, he proceeded to meet with the Blessed One and became his sincere student. See Ānanapānīka Thera and Hellmuth Hectar, Great Disciples of the Buddha: Their Lives, Their Works and Their Legacy, ed. Bhikkhu Bodhi (Boston: Wisdom Publications, 2003) 49-53.
18 In this regard, dharmā is denoted as the phenomenal object of things. See D II 290.
19 Vin I 40: ye dharmā hetuprabhavā hetum teṣāṃ tathāgato hyavadat, teṣāṃ ca yo nirodha evamvādi mahāsamaṇṇaḥ.
20 The Pāli term idappaccayatā is analyzed by Bhikkhu Bodhi as a specific conditionality of the doctrine of the Paṭiccasamuppāda. He added that idappaccayatā, also referred to as the law of cause and effect, is the emergence of phenomena in dependence on specific conditions and circumstances. See Bodhi, The Great Discourse of Causation: The Mahānidāna Sutta and its Commentaries, 2.
21 M III 63: imasmim sati idaṃ hoti, imassuppadā idaṃ uppaṭjati, imasmim asati idaṃ ha hoti, imasa nirodhā idaṃ nirujjhati.
22 Ānanada served as the Buddha’s primary attendant. According to the Mahānidāna Sutta of Dīgha Nikāya, we can find a conversation between the Buddha and Ānanada in which the Blessed One addressed how the doctrine of the Paṭiccasamuppāda is marvelous, astounding, eye-opening and deep to comprehend. In the same discourse, we further observe the Buddha’s admonishment to Ānanada while he mentions that the teaching of the Paṭiccasamuppāda was easy and clear to understand. For a detailed analysis, see D II 55.
23 See Vin II 96; S III 16; A III 406.
can be subdivided into two words: \textit{saŋ} or \textit{sam} and \textit{uppāda} [\textit{saŋ} (with) + \textit{uppāda} (arising)].\textsuperscript{24} Both the words \textit{samuppāda} and \textit{uppāda} imply “origin”, “arising”, “genesis”, “production” or “coming to be”.\textsuperscript{25} Buddhaghosa\textsuperscript{26} defines the term \textit{Paṭiccasamuppāda} in terms of three words: \textit{Paṭicca}, \textit{sammā}, and \textit{uppāda} [\textit{Paṭicca} (having dependent) + \textit{sammā} (a right) + \textit{uppāda} (arising)].\textsuperscript{27} According to Buddhaghosa, the Pāli word \textit{Paṭiccasamuppāda} can be rendered as either “having dependent, a right arising” or “dependent on causes rightly by”.\textsuperscript{28} Literally, the Pāli term \textit{Paṭiccasamuppāda} can be translated into English as “Dependent Origination,” or “Dependent Arising”.\textsuperscript{29} Peter Della Santina transliterated the \textit{Paṭiccasamuppāda} as “Interdependent Origination” or “the chain of causation”.\textsuperscript{30}

Annotated Translation of the \textit{Paṭiccasamuppāda}

The discourse of the \textit{Paṭiccasamuppāda}, in both theoretical and practical formats, is found in a number of places in the Pāli manuscripts. The theoretical formula of the \textit{Paṭiccasamuppāda}, also known as the law of conditionality (\textit{idappaccayatā}), is articulated through the exposition of causes (\textit{hetu}) and conditions (\textit{paccaya}). Referring to the “Bahudhātuka

\textsuperscript{24} \textit{Paṭiccasamuppāda} is rendered in Sanskrit as \textit{Pratītyasamutpāda}, which is also derived from the combination of two words: \textit{pratītya} and \textit{utpāda} [\textit{pratītya} (dependent) + \textit{utpāda} (origination)]. This Sanskrit translation is similar to the Pāli phrase and follows the same grammatical structure. See Chowdhury, “Unfolding Dependent Origination,” 6930.

\textsuperscript{25} Ibid.

\textsuperscript{26} Buddhaghosa was a commentator, translator and philosopher of Theravāda Buddhism. He is well known for his monumental book \textit{Visuddhimagga (Path of Purification)}, which was compiled around the 5th century. The translator of the \textit{Visuddhimagga (Path of Purification)}, Nāṇamoli Bhikkhu, stated that the \textit{Visuddhimagga} is recognized as a masterpiece of world literature that methodically organizes and interprets the teachings of the Buddha found in the Pāli \textit{Tipiṭaka}. See Bhadantācariya Buddhaghossa, \textit{Visuddhimagga: The Path of Purification}, trans. Bhikkhu Nāṇamoli (Colombo: Samayawardana Printers, 2010) xxvii.

\textsuperscript{27} Vism 574: \textit{Keci pana paṭicca sammā ca titthiyaparikappitapakatipurisādikāraṇanirapekkho uppādo paṭiccasamuppādoti evam uppādamattam paṭiccasamuppādoti vadanti.}

\textsuperscript{28} Buddhaghossa, \textit{Visuddhimagga}, 533.

\textsuperscript{30} Peter Della Santina, \textit{The Tree of enlightenment} (Taiwan: Buddha Dharma Education Association Inc., 1997) 119.
Sutta” of the Majjhima Nikāya, a conversation between the Buddha and Ānanada can be found, where the Blessed One introduces the law of causation [or the theoretical formula of the Paṭiccasamuppāda] as follows:

“When this exists, that comes to be; with this arising from this, that arises. When this does not exist, that does not come to be; with the cessation of this, that ceases.”

On the other hand, the practical aspect of the Paṭiccasamuppāda was presented through introducing twelvefold links within two sequences of forwarding (anuloma) and reversing (paṭiloma) orders. The twelvefold linkage of the Paṭiccasamuppāda are: (i) ignorance (avijjā), (ii) mental formations or fabrication (saṅkhāra), (iii) consciousness (viññāṇa), (iv) mentality and materiality (nāmarūpa), (v) sixfold sense bases (saḷāyatana), (vi) contact (phassa), (vii) feeling (vedanā), (viii) craving (taṅhā), (ix) clinging (upādāna), (x) becoming (bhāva), (xi) birth (jāti), and (xii) aging and death (jarāmaraṅa).

The discourse of the Paṭiccasamuppāda in terms of practical aspects is translated into two sequences, with reference to the “Nidāna Vaggo” of Saṁyutta Nikāya,

1. Forwarding order (anuloma) of the Paṭiccasamuppāda:
With the condition of ignorance, mental formations, arise;
With the condition of mental formations, consciousness, arises;

31 See M III 63.
32 The Blessed One is referred to the Buddha. See Vism 210.
34 Ud 1-3; S II 25-26.
35 Ibid.
With the condition of consciousness, mentality and materiality arises;
With the condition of mentality and materiality, sixfold sense bases arise;
With the condition of sixfold sense bases, contact arises;
With the condition of contact, feelings arise;
With the condition of feeling, craving arises;
With the condition of craving, clinging arises;
With the condition of clinging, becoming arises;
With the condition of becoming, birth arises;
With the condition of birth, ageing and death, sorrow, lamentation, pain, grief and despair [come into play]. This is the genesis of all of this suffering [stress and dissatisfaction].

II. Reversing order (paṭiloma) of the Paṭiccasamuppāda:
With the cessation of ignorance, mental formations cease;
With the cessation of mental formations, consciousness ceases;
With the cessation of consciousness, mentality and materiality cease;
With the cessation of mentality and materiality, sixfold sense bases cease;
With the cessation of the sixfold sense base, contact ceases;
With the cessation of contact, feeling ceases;
With the cessation of feeling, craving ceases;
With the cessation of craving, clinging ceases;
With the cessation of clinging, becoming ceases;
With the cessation of becoming, birth ceases;

In a study of Pāli literature, mental states [or consciousness] can be defined using four different terms, such as mentality (nāma), thought (citta), mind (mano) and consciousness (viññāṇa). See Sanjoy Barua Chowdhury, “The Process of Life in Dependent Origination: An Analysis Based on Buddhist Psychology”, Ph.D. Dissertation (Ayutthaya: Mahachulalongkornrajavidyalaya University, 2019) 51.

Translation by the author of the article.
With the cessation of birth, ageing, and death, sorrow, lamentation, pain, grief, and despair cease. This is the cessation of all this suffering [stress & dissatisfaction].

Interpretations of the Twelvefold Links of the Paṭiccasamuppāda

The Buddha’s proposal of the twelvefold links and their active roles are delineated within the forward and reverse models of the Paṭiccasamuppāda. In addition to the work of Buddhist scholars, Buddhist scriptures provide detailed information on these twelvefold formulas. Based on the Nikāya manuscripts and scholars’ views, Buddhist interpretations of the twelvefold formulas are as follows:

1. The first constituent of the cycle of the Paṭiccasamuppāda is ignorance (avijjā), which refers to “lacking knowledge or information”. The Buddha defines ignorance as the lack of knowing the four noble truths (cattāri ariya saccāni), namely suffering, its origin, its cessation, and the way to its cessation. Gethin defines “ignorance” as a positive misconception and not the mere absence of knowledge. Based on the wisdom of the Pāli manuscripts, ignorance is defined as the foundation of all evil actions and wrong views, along with the taproot of suffering (dhakka); therefore, it stands first in the formula of the Paṭiccasamuppāda.

Translation by the author of the article.

See D II 91.

See S II 4.

S V 1.

See S II 2; S XII 4; D II 91.
2. The second link in the cycle of the Paṭiccasamuppāda is mental formation (saṅkhāra). Bhikkhu Bodhi translates the Pāli term saṅkhāra as “volitional formation”, whereas A.P. Buddhadatta Mahathera defines it as “mental coefficients”. I. B. Honor renders saṅkhāra as “habitual tendencies”. The Buddha acknowledges three kinds of volitional formations: bodily volitional formation, verbal volitional formation, and mental volitional formation. In brief, the mental formation can be expressed as habitual tendencies [whether positive or negative] that lead the mind to attach to the aforementioned three actions. Based on the Buddha’s above exposition, Bhikkhu Bodhi asserts that the Buddhist concepts of Kamma (actions) and mental formation (saṅkhāra) are synonymous.

3. The third is consciousness (viññāna), which defines the mental quality. Inquiring in the Nikāya manuscripts, the words mentality (nāma), thought (citta), mind (mano) and consciousness (viññāna) are all used as synonyms for one another. According to Buddhist doctrine, the mind predominates over both wholesome and unwholesome actions. In this sense, consciousness is crucial to understanding how the mind generates phenomenal and physical actions. The Buddha classified consciousness into sixfold categories: eye-consciousness, ear-consciousness, nose-consciousness, tongue-consciousness, body-consciousness and mind-consciousness. However, the Buddhist teaching of consciousness offers the basis for a comprehensive understanding of

---

49 See S II 4.
52 Dhp 1-2: Manopubbangamā dhāmā manoseṭṭhā manomayā; Manasā ce paduṭṭhena bhāsa-ti vā karoti vā.
53 See S II 4.
mental states, whether wholesome or unwholesome. Bhikkhu Bodhi signifies the appearance of consciousness as follows:

“Consciousness appears as an enduring subject due to a lack of attention. When it is mindfully examined, the appearance of lastingness is dissolved by the perception of its impermanence.”\(^\text{54}\)

Additionally, Buddhist scripture clarifies that consciousness and wisdom are inseparable and precisely states that wisdom cannot flourish alone without an awareness of consciousness.\(^\text{55}\) The Buddhist interpretation of consciousness reveals a clear notion of the role of the mind and its various directions [or mental concomitants].

4. Mentality and materiality (nāma-rūpa) are listed as the fourth link together. According to Buddha, mentality (nāma) is precisely correlated to feeling (vedanā), perception (saññā), volition (cetanā), contact (phassa) and attention (manasikāro), while form or materiality (rūpa) derives from the four great elements (mahābhūtānāṃ upādāyārūpam).\(^\text{56}\) The Venerable Buddhaghosa, in The Path of Purification (Visuddhimagga), affirms that when mentality and materiality (nāma-rūpa) are connected to the five aggregates (pañcakhandha), mentality (nāma) is correlated with the three aggregates of feeling (vedanā), perception (saññā) and mental formation (saṅkhāra), whereas materiality is signified with the aggregate of material form (rūpa).\(^\text{57}\)

5. The fifth link in the cycle of the Paṭiccasamuppāda is the six sense bases (saḷāyatana), which define the six sense organs, including the eye base (cakkhāyatana), the ear base (sotāyatana), the nose base (ghānāyatana), the tongue base (jivhātana), the body base (kāyāyatana) and the mind base (manāyatana).\(^\text{58}\) Inquiring into the Nikāya manuscripts, the six sense doors are operated by the

\(^{58}\) S II 3.
mind base.\textsuperscript{59} In fact, the mind is the key term for noticing responses from the bodily organs.\textsuperscript{60}

6. The sixth link of the \emph{Paṭiccasamuppāda} is contact (\textit{phassa}), as it results from the interaction between mentality (\textit{nāma}) and materiality (\textit{rūpa}).\textsuperscript{61} Rhys Davids and William Stede define contact (\textit{phassa}) as the fundamental fact in the sense of impression.\textsuperscript{62} Inquiring into the \emph{Nikāya} manuscripts, Mahākacchāna\textsuperscript{63} expresses contact as follows:

“As dependent on the eye and forms, eye-consciousness arises. The meeting of the three is contact.”\textsuperscript{64}

The aforesaid statement clearly indicates the crucial significance of consciousness in the process of the mentality and materiality mechanism. The Buddha classified contact into six ways: eye-contact (\textit{cakkhusamphasso}), ear-contact (\textit{sotasamphasso}), nose-contact (\textit{ghānasamphasso}), tongue-contact (\textit{jivhāsamphasso}), body-contact (\textit{kāyasamphasso}) and mind-contact (\textit{manosamphasso}).\textsuperscript{65}

7. The seventh link is feeling (\textit{vedanā}). Interpreting the cycle of the \emph{Paṭiccasamuppāda}, feeling is distinguished into six aspects: feeling born of eye-contact (\textit{cakkhusamphassajā}), feeling born of ear-contact (\textit{sotasamphassajā}), feeling born of nose-contact (\textit{ghānasamphassajā}), feeling born of tongue-contact (\textit{jivhāsamphassajā}), feeling born of body-contact (\textit{kāyasamphassajā}) and feeling born of mind-contact (\textit{manosamphassajā}).\textsuperscript{66}

8. The eighth formula is craving (\textit{taṇhā}), which is also denoted as one of the chief roots of suffering.\textsuperscript{67} Buddhist scripture makes

\textsuperscript{59} See Dhp 1-2.
\textsuperscript{60} See M I 108.
\textsuperscript{61} Sn 170: \textit{Nāmañca rūpañca paṭicca phassā; icchāṇidānāni pariggahāni, icchāya’santyā- na mamattamatthi, rūpe vibhute na phusanti phassā.}
\textsuperscript{63} Mahākacchāna is recognized as one of the skilled and versatile teachers of eighty outstanding disciples of the Buddha in accordance with the \emph{Nikāya} manuscripts. For a detailed investigation, See Thag 494-501.
\textsuperscript{64} M I 111: \textit{Cakkhusamphasso rūpe ca uppajjati cakkhuvīññānam. Tiṇṇaṃ saṅgati phasso.}
\textsuperscript{65} See S II 3.
\textsuperscript{66} See S II 3; M I 396; S III 226.
\textsuperscript{67} See Dhp 334-359.
it clear that craving rules the world.\textsuperscript{68} In the discourse of the \textit{Paṭiccasamuppāda}, the Buddha expounds upon six classes of craving: craving for forms (rūpatan̄hā), craving for sounds (saddatan̄hā), craving for smells (gandhatan̄hā), craving for tastes (rasatan̄hā), craving for tactile objects (phoṭṭhabbatan̄hā) and craving for mental phenomena (dhammatan̄hā).\textsuperscript{69}

9. The ninth constituent, clinging (upādāna), is commonly referred to as grasping.\textsuperscript{70} The Blessed One expounds on four kinds of clinging: clinging to sensual pleasures (kāmūpādāna), clinging to views (diṭṭhūpādāna), clinging to rules and vows (silabbatūpādāna), and clinging to a doctrine of self (attavādūpādāna).\textsuperscript{71} In addition, the process of clinging has a strong bond with the five aggregates (paṅca-kkhandho). Therefore, on the basis of the aggregates, the Blessed One classified clinging-aggregates into five aspects: form as a clinging-aggregate (rūpūpādākkhandho), feeling as a clinging-aggregate (vedanūpādākkhandho), perception as a clinging-aggregate (saññūpādākkhandho), fabrication as a clinging-aggregate (saṅkhārāūpādākkhandho) and consciousness (viññāṇūpādākkhandho) as a clinging-aggregate.\textsuperscript{72}

10. The tenth link of the \textit{Paṭiccasamuppāda} is the existence or becoming (bhāva), which refers to the sensual characteristics of the body.\textsuperscript{73} The Buddha describes its threefold existences: sense-sphere existence (kāmabhavo), form-sphere existence (rūpabhavo) and formless-sphere existence (arūpabhavo).\textsuperscript{74}

11. The eleventh link is birth (jāti), which comprises the entire embryonic process beginning with conception and ending with parturition.\textsuperscript{75} The Blessed One expounds upon birth as follows:

\end{thebibliography}
“The birth of the various beings into various orders of beings, they are being born, descend into production, the manifestation of the aggregates, the obtaining of the sense bases.”

12. The twelfth constituent is ageing and death (jarāmarana). According to the discourse of the Paṭiccasamuppāda, the Blessed One explained that ageing (jarā) refers to a being’s old age, brokenness, greyness, wrinkling, decline of vitality, and degeneration of the faculties, whereas death (marana) refers to a being’s deceasing, passing away, breaking up, disappearance, mortality, death, completion of time, breaking up of the aggregates and casting off of the body.

The Doctrinal Significance of the Paṭiccasamuppāda

Despite the fact that the four noble truths (cattāri ariyasaccāni) are regarded as the Buddha’s awakening discovery, the concept of the Paṭiccasamuppāda is the methodological approach to how to end suffering along the path to ultimate freedom. The four noble truths and the concept of the Paṭiccasamuppāda are integral to each other because the principal object of both doctrines is to clarify the taproot and cessation of suffering, i.e., dukkha. According to the Buddha’s first discourse, “Setting the Well of Dhamma in Motion”, the four noble truths are expounded as follows:

1. The first noble truth is suffering, which includes birth, ageing, illness, death, sorrow, lamentation, pain, grief and despair.
2. The second truth is the origin of suffering, which is defined as clinging that leads to further becoming within the cycle of saṃsāra.

---

76 Ibid.
77 See S II 3.
78 Despite the Pāli term, dukkha is commonly translated as suffering or dissatisfaction, its intricate meaning makes it difficult to convey in English. According to the discourse of the Paṭiccasamuppāda, the Buddha mentioned eight types of suffering, including birth, aging, death, sorrow, lamentation, pain, grief and despair. See S II 3-4.
79 See S V 420.
The discourse mentioned three kinds of craving: craving for sensual pleasure, craving for existence, and craving for non-becoming.\(^{80}\)

3. The third noble truth is the cessation of suffering that can be acquired by abandoning craving.\(^{81}\)

4. The fourth noble truth is the path leading to the cessation of suffering. Here, the path refers to the noble eightfold path.\(^{82}\)

As per the above description, the four noble truths can be divided into two groups: (I) the first two are grouped together as suffering and its origin, and (II) the final two are placed in a separate category as the end of suffering and the path to ceasing the suffering. Both groups explicitly demonstrated the Buddhist soteriological approach, which is methodologically articulated in the two sequences of forwarding (anuloma) and reversing (paṭiloma) orders in the Paṭiccasamuppāda. Practical aspects of the Paṭiccasamuppāda clarify its connection with the four noble truths as follows:

1. Forwarding (anuloma) of the twelfold constituents of the Paṭiccasamuppāda: Ignorance (avijjā) \(\rightarrow\) Volitional formation (saṅkhāra) \(\rightarrow\) Consciousness (viññāṇa) \(\rightarrow\) Mentality and materiality (nāma-rūpa) \(\rightarrow\) Six sense bases (saḷāyatana) \(\rightarrow\) Contact (phassa) \(\rightarrow\) Feeling (vedanā) \(\rightarrow\) Craving (taṇhā) \(\rightarrow\) Clinging (upādāna) \(\rightarrow\) Becoming (bhāva) \(\rightarrow\) Birth (jāti) \(\rightarrow\) Aging and Death (jarāmarana) \(\rightarrow\) … Sorrow (soka), lamentation (parideva), pain (dukkha), grief (domanassa) and despair (upayasa) = The origin of suffering (dukkha samudaya) = the first and second noble truths.

2. Reversing the order (paṭiloma) of the twelffold constituents of the Paṭiccasamuppāda: Ignorance (avijjā) ceases \(\rightarrow\) Volitional formation (saṅkhāra) ceases \(\rightarrow\) Consciousness (viññāṇa) ceases \(\rightarrow\) Mentality and materiality (nāma-rūpa) ceases \(\rightarrow\) Six sense bases (saḷāyatana) ceases \(\rightarrow\) Contact (phassa) ceases \(\rightarrow\) Feeling (vedanā) ceases \(\rightarrow\) Craving (taṇhā) ceases \(\rightarrow\) clinging (upādāna)

\(^{80}\) Ibid.

\(^{81}\) See A II 211; M I 256; S III 227; S v 420.

\(^{82}\) The noble eightfold path includes the right view, right resolve, right speech, right action, right livelihood, right effort, right mindfulness and right concentration. For a detailed investigation of the noble eightfold path, see A 1 178; D II 72; M I 299; S II 104.
ceases → Becoming (bhāva) ceases → Birth (jāti) ceases → Aging and Death (jarāmarana) ceases → … Sorrow (soka), lamentation (parideva), pain (dukkha), grief (domanassa) and despair (upayasa) cease = The cessation of suffering (dukkha nirodha) = the third and fourth noble truths.

Based on the notes mentioned above, if the realization of the four noble truths is considered to be the ultimate goal for seekers and devotees, the doctrine of the Paṭiccasamuppāda is applied as the methodology of Buddhist soteriology, i.e., nibbāna.

Conclusion

The concept of the Paṭiccasamuppāda describes the vision of life through demonstrating twelvelfold links – from birth to death. Examining the depth of every link brings an explicit notion that everything is interconnected and inseparable, i.e., nothing exists independently of its cause and condition. The causal relationships of the law of the Paṭiccasamuppāda assert that the process of life and its motion are a part of the chains of twelvelfold links. The Buddha’s teaching of the Paṭiccasamuppāda clearly outlines the taproot of suffering and its path to cessation. The doctrinal and scriptural study of this paper clarifies the connection between the concept of the Paṭiccasamuppāda and the four noble truths. If realizing the four noble truths is considered to be the ultimate aim for seekers and followers, the understanding of the doctrine of the Paṭiccasamuppāda – also known as the attainment of nibbāna – is applied as the Buddhist soteriological methodology.

We can conclude from the discussion in the scripturally based research paper that the doctrine of the Paṭiccasamuppāda is unquestionably the most profound, distinctive and dynamic yet subtle teaching in Buddhist doctrine. By providing a landscape of its historical genesis, explicit meaning, annotated tradition, interpretation and doctrinal significance, the discourse of the Paṭiccasamuppāda can be considered the pivotal Buddhist teachings that succinctly articulate the path of ultimate liberation. The Buddha’s objective was to present the teaching of the Paṭiccasamuppāda to delineate clear steps and motions of life from womb to tomb, in addition to seeking out the taproot of suffering and
the method to vanquish it. The concept of Paṭiccasamuppāda is valued for the teaching of the Buddhist method of eradicating dukkha as well as directions for an ethical life, which is how its doctrinal relevance and significance are expressed.

Acknowledgements

My sincere gratitude goes out to Prof. Anja Zalta, for inspiring me to conduct this research paper for the journal Poligrafi. For their valuable time in collecting and sharing insightful information for this research project, my sincere gratitude to eminent Pâli scholar and Nikâya text translator Bhikkhu Bodhi; respected Prof. Dr. Kapila Abhyawansa; Prof. Dr. Padmasiri De Silva; Prof. Lozang Jamspal; Larry Mallet and dedicated western Dharma practitioner Ms. Eunice E. Cerezo. It would be incomplete if I did not mention the late Sâdhanânanda Mahâsthâbir Bana Bhântë, who introduced me to the concept of the Paṭiccasamuppâda during my earlier path to Buddhist spirituality. I am grateful to Dr. Phibul Choompolpaisal, the Dean of the College of Religious Studies (CRS) of Mahidol University (MU), for his continuous support and encouragement throughout my academic journey at Mahidol University. I greatly appreciate Assoc. Prof. Abanti Barua’s thoughtful assistance in editing and reviewing the final edition of this article. Last but not least, I am deeply indebted to my late mentor, Phra Khru Baitika Dr. Barton Yanathiro, for inspiring and guiding me on the path of academia. For her unwavering support throughout, my mother, Mrs. Ruma Barua Chowdhury, deserves my deepest gratitude and respect.
