

CONTEMPORARY KINESIOLOGY: 5TH INTERNATIONAL SCIENTIFIC CONFERENCE

Split, Croatia, 28th – 30th August 2015

University of Split, Faculty of Kinesiology in cooperation with Science and Research Center, University of Primorska (Koper, Slovenia), Faculty of Sport and Physical Education (Sarajevo, Bosna & Herzegovina); Faculty of Sport and Physical Education (Novi Sad, Serbia) organized an international scientific conference titled Contemporary Kinesiology for the fifth time, focusing on Physical Education, Sport and Health Issues. The aim of the Conference was to promote the latest methods and techniques developed by researchers involved in the application of kinesiology and sport in contemporary life. This year, nearly two hundred scientists and researchers from twenty countries presented their work on the following topics a) Contemporary Sport Issues; b) Trends in Physical Education; c) Physical Activity for Health. The papers, accepted by two independent reviewers, were published in the electronic Conference Proceedings. The Conference itself comprised keynote speeches of some eminent scientists, original scientific papers presented by the authors, as well as poster presentations. The scientific program included the lectures by the following eminent international experts: Slobodan Jarić, Rado Pišot, Nic James, Raul Oliveira, Sergej Ostojić, Boštjan Šimunič, Goran Sporiš. Prof. Pišot, Ph.D., held a lecture addressing the role of fundamental motor patterns in child's motor development, while Prof. Šimunič, Ph.D., introduced new knowledge and results from TMG studies and discussed perspectives in muscle physiology.

The whole scientific agenda, including pleasant social interaction, took place in the Split University Library, which permitted the participants to network, exchange experiences and ideas with the possibility of further development of possibilities for cooperation.

5. MEDNARODNA ZNANSTVENA KONFERENCA SODOBNA KINEZILOGIJA

Split, Hrvaška, 28.–30. avgust 2015

Fakulteta za kineziologijo Univerze v Splitu je v sodelovanju z Znanstveno-raziskovalnim središčem Univerze na Primorskem iz Kopa (Slovenija), Fakulteto za šport in telesno vzgojo iz Sarajeva (Bosna in Hercegovina) in Fakulteto za šport in telesno vzgojo iz Novega Sada (Srbija) že petič organizirala mednarodno znanstveno konferenco Sodobna kineziologija, na kateri so razpravljali o telesni vzgoji, športu in zdravstvenih vprašanjih. Cilj konference je bila promocija najnovejših metod in tehnik, ki so jih razvili raziskovalci na področju aplikativne kineziologije in športa v sodobnem življenju. Skoraj 200 znanstvenikov in raziskovalcev iz 20 držav je letos predstavilo svoje delo na naslednjih področjih: a) vprašanja sodobnega športa; b) trendi v telesni vzgoji in c) telesna aktivnost in zdravje. Prispevki, ki sta jih odobrila dva neodvisna ocenjevalca, so bili objavljeni v elektronskem zborniku konference. Na konferenci so se zvrstila razna predavanja, predstavljeni so bili tudi znanstveni članki in posterji. V okviru znanstvenega programa so predavali nekateri priznani mednarodni strokovnjaki, in sicer: Slobodan Jarić, Rado Pišot, Nic James, Raul Oliveira, Sergej Ostojčić, Boštjan Šimunič in Goran Sporiš. Dr. Pišot je predaval o vlogi temeljnih motoričnih vzorcev v razvoju otroške motorike, dr. Šimunič pa je predstavil nova znanja in izsledke TMG-študij ter govoril o perspektivi fiziologije mišic.

Celoten dogodek, vključno s prijetnim druženjem, se je odvijal v splitski Univerzitetni knjižnici, kjer so sodelujoči lahko izmenjevali stike, izkušnje in zamisli ter razpravljali o možnostih kasnejšega sodelovanja.
